

Aluminium Casting Solutions | Your Global Partner

The history of Alteams stretches back over half a century, with roots in industrial foundry operations in Finland and Sweden in the 1940s. Alteams is today a privately owned Finnish company.

Building on this solid foundation in the northern industrial environment, Alteams has expanded into a truly global enterprise with annual sales level of one hundred million Euros, international support services, and five production facilities located in Finland, China, Poland, and India. Alteams employs over 1,700 real professionals. The company has regional customer support units in all manufacturing locations, as well as in Sweden and Japan.

Alteams offers more than aluminium casting using three different casting methods. The company has its own dedicated tool design and manufacturing facility in China. In cooperation with its long-term strategic partners, the company offers an even broader range of castings. This means that Alteams has a wide capacity range, from single prototype units to mass production and from one hundred grams up to one ton.

Technological development has given Alteams a range of competencies that goes beyond regular foundry operations, from initial R&D and prototyping all the way to mass production and deliveries. Alteams has its own R&D operations and a vast experience in producing innovations in aluminium casting and added value processes. This makes Alteams your excellent partner and ideal choice for you at every stage of your product development and manufacturing. Alteams works closely with customers to solve their casting design, aluminium alloy, heat transfer, shielding, and sealing challenges.

High quality and continuous improvement

The quality objectives at Alteams are to produce high-quality products on time and at a cost effective and competitive price level. It results in the best customer satisfaction and continuous improvements in process efficiency. Operational Excellence is a part of the continuous improvement program. The target is to minimize non-value-added activities in daily operations and minimize quality costs. Best practices are shared systematically between our factories.

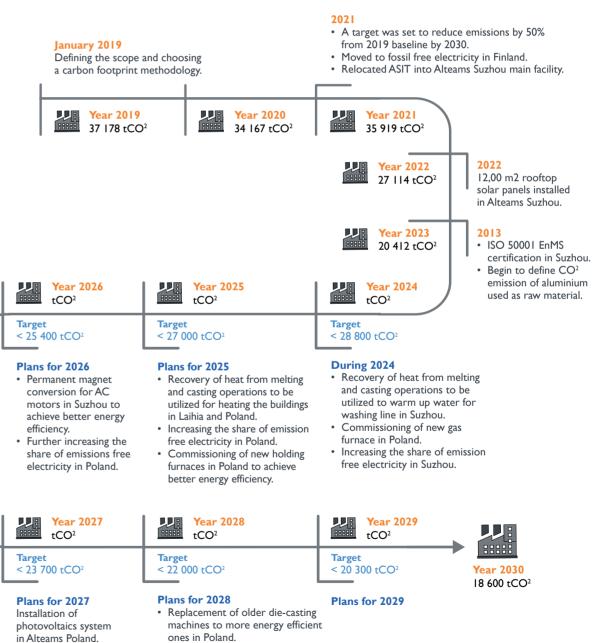

Alteams Quality Management System is certified according to the ISO 9001, I4001 and the automotive standard IATF 16949 requirements in Alteams factories in Poland, China, Finland, and India.

Alteams Sustainability Program - our commitment to the future

Strong focus on sustainability is an essential part of our operations. Alteams has created a Sustainability Program using the UN's Sustainable Development Goals as a framework. We not only strive to be a responsible operator, but also to inspire others to act more responsibly.

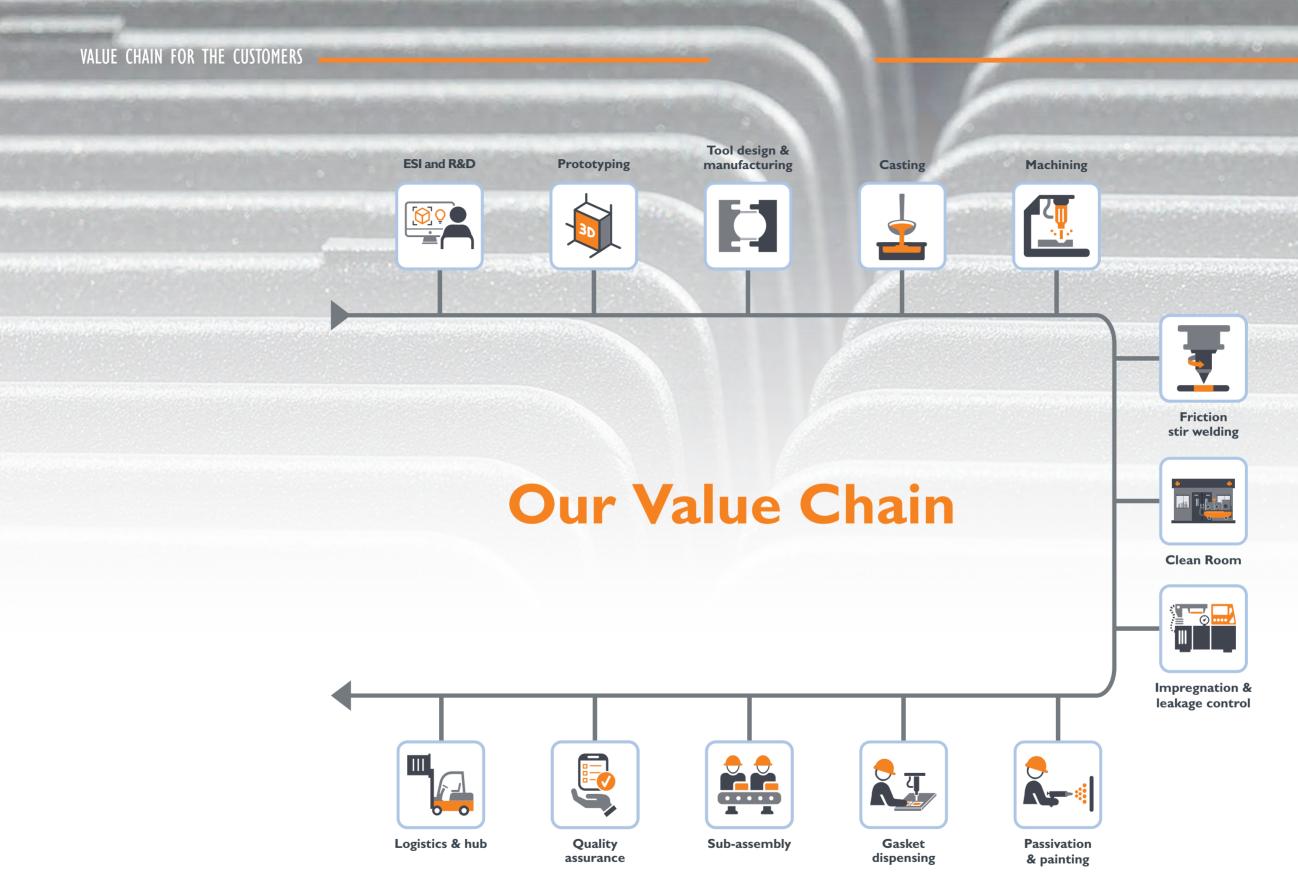

Alteams Carbon Reduction Roadmap

One of the most significant aims in Alteams
Sustainability Program is to reduce our company's
carbon footprint. Alteams Carbon Reduction
Roadmap provides a structured approach to
systematically reduce our carbon footprint while
enhancing processes and continuous improvement.

 Installations of energy management technology in Suzhou.
